The first and only simpllab.com script language, Simpllab® Script is designed to make it easy to create powerful, interactive, animated, multimedia, business and scientific programs. Create a whole new universe of interactive programs in minutes with Simpllab® Script-a highly productive scripting language. A revolutionary program development platform, Simpllab® Script is the only script language that lets you create programs that respond to typed commands, mouse clicks, and natural speech. Simpllab® Script is a completely visual language. You draw your programs using flow charts, sequence diagrams, and other visual-design tools and then write scripts with clear, concise, script-authoring syntax. Simpllab® Script is a simplified version of the more complex and proprietary Simpllab® Script Professional. To use Simpllab® Script with your present equipment, you'll need a Simpllab® Script mini-license. With clear voice-recognition technology, you can develop scripts using only your voice. You can create apps that do everything from inventory management to scientific simulations. Applications can interact with other Simpllab® Script applications, as well as with other languages and database applications. Simpllab® Script is a complete language, supporting database access, HTML development, video, sound, and more. Also:

- Compatible with VESA and Thin Clients
- Compatible with MicroSoft Access 97 and 2000, MicroSoft Works, and Microsoft FoxPro
- Simpllab® Script small footprint, runtime, and memory requirements
- Fast, easy-to-learn development with Author- i.e. You can build a whole universe of sophisticated, interactive applications in minutes.

Six reasons to use Simpllab® Script:

1. Simpllab® Script is easy-to-use but powerful
2. Simpllab® Script is built on a modular architecture that encourages reuse and rapid development
3. Simpllab® Script is built with object-oriented philosophy so scripts are easily maintainable and scalable
4. Simpllab® Script is not a proprietary language but can co-exist with existing toolsets like Access, FoxPro, VB, and VB.Net
5. Simpllab® Script can interact with Microsoft Access, FoxPro, Microsoft Works, Microsoft Works-Open Tool, Microsoft Works-B

The federal government's own rules limit how much lawmakers themselves can be paid when they're not actually sitting in the Capitol, but a new report from the Congressional Research Service suggests Congress might have to do away with that prohibition. The services study, released Monday, said it's not clear Congress can or should amend the rule, but it said some lawmakers believe a tweak might be necessary. "This provision of the Code of Federal Regulations was put in place during a period when salaries were insufficient to attract adequate numbers ba244e880a
