This means the processor cannot address more than 3.25 GB of physical RAM. This is the reason your 32-bit patches work on a 64-bit Windows 7. Windows 10 64-bit will have the same limitation. 5]. From the *in vitro* observations, the role of cortical bone, which is generally thinner than trabecular bone and consists of 50--60% of the bone volume, might be less pronounced in spine fractures. However, we showed that also in cortical bone, cell survival was reduced, and this could have an important role in bone healing after trauma. We believe that the findings from this study provide a mechanism-based explanation for reduced bone healing after trauma. Abbreviations ===== PB
