The 4 ways you could be losing the race to save your liver By Nick Janzen Oct 6, 2014 When I was young, I used to look forward to having my organs "removed" at the end of my life. It was my hope, perhaps naïve hope, that I would go into the afterlife with one less problem than I went into the world with. You could say I was a little young to realise what would be happening once my time came around, but the reality of how our body works is now much more pronounced. I have seen people, people who obviously care for their health, put enormous time and effort into trying to improve their health and their long term prognosis. It only took one rotten egg to burst on the way. I have seen people, even those who might not have thought they could get sick, have to suddenly be forced to change their behaviour to preserve their health for the time being. Sometimes that means changing their lifestyle and diet. Sometimes it means cutting out
