Its functionality is similar to Photoshop and other such image editors.Q: Vigenere Cipher - Print certain words in lowercase My class assignment is to create a program using a Vigenere cipher that will print all the words in the wordlist-mama.txt file in the input file-papa.txt lower case. For example: if the user inputs mama, the output should be papa. The same with the input of the file. Also in the program I have to prompt the user for a key and a number of letters. How do you implement the concept of looping through the input file and then looping through the key and then running through the alphabet? I tried working on it all night and am stuck. Thank you! Here is what I have so far: public static void main(String[] args) throws IOException { Scanner reader = new Scanner(System.in); int keylength = reader.nextInt(); String key = new String(new char[keylength]); reader.nextLine(); reader.nextLine(); reader.nextLine(); PrintWriter output = new PrintWriter(new BufferedWriter( new OutputStreamWriter(System.
