A: Mysql Error Codes The error code 29 means “Table ‘mydbname.mytablename’ doesn’t exist.” Table mydbname.mytablename doesn’t exist. Step 1: Click OK. This will set up the table in your database. Step 2: Restart MySQL, or if you’re doing this over the network, restart your MySQL server. MySQL error Code 16 Means that “Table ‘xyz.’” doesn’t exist. MySQL Error Code 17 Means that “Table xyz.”, “Field xyz.”, or “Index xyz.” doesn’t exist. MySQL error Code 18 Means that there is an error in the query. Step 1: Make sure that you have typed your query correctly. Step 2: Check your syntax. Maybe your query contains an invalid character or a SQL statement that is out of the scope of MySQL. If you find your SQL statement invalid, use the SHOW ERRORS statement to see the exact error message. If your query is not syntactically correct, use SHOW WARNINGS to see which part of the query is the source of the error. MySQL error Code 19 Means that “Field xyz.” doesn’t exist. Step 1: Ensure that your query has the correct field name. Step 2: Check the field name and datatype in your database. If they are not the same as what you’ve specified, you have an error in your query. If the problem is with a table, check whether the field name is misspelled or the field name is invalid. If the problem is with a field, check the field name and datatype in your database. Step 1: Check your query again, ensuring that the field name is correct. Step 2: Check your field name and datatype in your database. Step 1: Check your query again, ensuring that the field name is correct. Step 2: Check your field name and datatype in your database. Step 1: Ensure that the number of field names matches the number of values. Step 2: Check your query again, ensuring that the number of field names matches the number of values. Step 1: Ensure that the number of field names matches
