pdf, .doc, .docx, .xls, .rtf, .txt, .html, .png, .jpg, .pdf, .ppt, .pptx, .xlsx, .msword, .png, .mpe) and edit/convert it as a text file. The program works in two modes:As a standalone application - user can view/edit any document that the program can open without a connection to any other server application.As an ASP.NET MVC/WebForms application server - when the file is uploaded to the server, it is automatically sent to the program. After this program gets the file, it performs a web request and gets the document's contents, converts it to a text file and returns the contents to the web browser.The conversion is done by selecting an output format from a list of selected file formats.This product includes a lite version of all the supported formats in the premium version. Download the free lite version to open non-supported formats. Features Conversion: PDF / TXT f3e1b3768c
