Install.Q: Jquery Mobile slider for rating 5 star I have a problem with this page: I need to put rating slider like in the post description. I tried this: But slider isn't visible. Could somebody help me? Thanks! A: jQuery UI Slider does not look as nice as JQM's Slider widget (so I will suggest to replace it with an own slider implementation. I used jQuery version 1.9 and the included CSS and jQuery UI stylesheet. Use a hidden input field for the rating value (in the example named input). Add a and use an with the id and name attributes set as used in the HTML markup. Read the value of the input in the click event handler of the buttons (up and down) and update the hidden input field.
