Rasmussen (2000). Size and biomass distribution in tropical grasslands. Eur J Soil Biol 40, 1-9. Category:Forest ecologyQ: How to create android window in bitmap? i am developing android application that takes the screen shot of device and put it as a custom background image. for this i am following the following link Is it possible to take a screenshot of the current activity of android app and display it as an image? and i am successfully taken screen shot of the android device and save it into sdcard as a bitmap. but my problem is now when i am trying to display this image as a custom background image as shown in the above link, it just display the small window at the top of the image. and i also need to know how to create window with black background in bitmap and then display that bitmap as the custom background image of the activity. please help me out. thanks A: in short you just take a screenshot and apply it to your surfaceview. also if you want black background you can draw black on a bitmap. Q: Google Contacts API : Change "id" to "name" in API response I am using Google Contacts API to get contact details. I want to change the "id" field in the API response to "name". But while doing this, the API returns the error : "Contact not found". My code : //The request code is a part of my MainActivity HttpTransport transport = new JsonHttpTransport(); URL url = new URL(""); JsonHttpRequest request = new JsonHttpRequest(url, transport, this); Api api = new Api("userid", "password", request); List contacts = api.getContacts(); for (Contact contact : contacts) { System.out.println("Name 2d92ce491b
