- Ableton Live 8, Reason, FL Studio, Studio One, Cubase, Logic, Reaper, StudioCreator, Pro Tools, Cubase SX, Audacity, Sonar or any software supported by a Midi input. MIDI is just a standard of data communication. - It accepts MIDI input from any digital music device such as Midi input from any MIDI enabled computer or software, or guitar / keyboard directly. - If the MIDI input was recorded using a DAW software that understands MIDI, you will be able to import the chord chart or song list you have created. - This software works with any Guitar, MIDI Keyboard and Software that can display MIDI data on screen. - You can input notes from the Keyboard or MIDI Instrument directly. You can even use the software to output MIDI when you want it, or have a friend play it for you. - It supports a wide variety of MIDI instruments, it can even play the chord chart itself. This program is very versatile. KEYMACRO Examples: - Acoustic / Electric Guitar - Electric Bass - Keyboard - Bass Guitar - Acoustic Piano - Piano - Strings - Korg M1 - Kaoss Pads - Cowbell - Sound Source from Audio Library (Sample) - Reverb / Delay / Other Effectors - Vocal - Electric Piano - Guitar Rig or

Other Musical Gear, VST plugins or Hardware - Any instrument you can think of. - The song list you see on the screen when you play is the last song selected. It can be customized to play the chord chart from the beginning. KeyMACRO Chords: - From last song played - From beginning of song list - All songs in song list - All songs in song list with latest song selected - All songs in song list with latest song selected in a specific key - All songs in song list in specific key - All songs in song list in specific key with newest song selected - All songs in song list in specific key with newest song selected in specific chord KeyMACRO Modes: - Show/hide modes on the screen. - Piano Roll / Song List: - Show all songs from the database. - Skip list: - Skip to the next song in the list. - Navigate to songs in the song list using key macros: - Previous Key (for the song list - previous selected song is skipped)
