currently using the QuickBooks Point of Sale, you can select to upgrade to the new version. When you use the version of Quickbooks Point of Sale for iOS, There is a huge app and a series of APIs to help you build POS solutions quickly and easily. You can add new functionality, sync data with a server, and monitor inventory. 3. Create and display messages using other data. Creating a message was previously reserved for creating bookmarks and invoice filters. But starting in the March 2018 release, you can create messages by associating up to 2 data fields with the message, like an address or number. You can also send a message to a specific list of customers, a list of phone numbers, or anyone who matches a phone number. Create, Send, and Manage Messages If you're used to creating bookmarks and invoice filters for Outlook, QuickBooks Point of Sale for iOS works similarly, except you are working with messages instead. Creating a message on the iPhone (left) takes you to a list of available contacts, which provides a way to add new contacts (right). You can add contacts from a list or choose from a contact card. There are three ways to create a message. In the first option, which is on the left side of the screen, you choose a contact (or you can choose a number or address). Then, you choose how to include that contact in the message, like adding it to a contact card, creating a new contact, or inserting it into the
