Working with layer The `_layer_` is the primary and most powerful tool in Photoshop. A `_layer_` is just an image; you can't really do anything with it until you turn it into a `_group_`, an object with its own behavior. First, you name the layer so that you and others who use the file later know what's in the layer. You can get a better sense of how you're dealing with a file with this practice. For example, if you simply named the layer "Dinner," you'd probably not make any changes to the actual layer but would work on the group. On the other hand, if you named the layer "Dinner-front," you'd probably make a number of changes to the actual layer and then later, when you needed to add something else, would add it on top of the previous layer and assign the layer a new name. The most basic layer-based image manipulation is the use of masking tools to alter a layer or layers without changing the original. Next, you take a look at the tools that let you change colors, textures, and anything else in an image. Then, you see layer filters that enable you to alter the effects of the layer. Finally, you can take a look at the many features that let you create and store layers so that you can reuse them over and over.

Q: Android TextView.setText doesn't change text I'm new to Android. As a learner I want to make a text app to learn its API. The problem is that I'm not able to update the TextView. This is my code: package com.example.shubh.textview; import android.content.Context; import android.content.res.TypedArray; import android.graphics.Canvas; import android.graphics.Color; import android.graphics.Paint; import android.graphics.Path; import android.graphics.RectF; import android.support.v7.app.AppCompatActivity; import android.os.Bundle; import android.util.AttributeSet; import android.view.MotionEvent; import android.view.View; import android.widget.FrameLayout; import android.widget.RelativeLayout; import android.widget.TextView; import android.widget.Toast; public class MainActivity extends AppCompatActivity { private Context context; private RelativeLayout rlContainer; private TextView viewContainer, viewText; private TextView viewCustom; private static final Paint paint = new Paint(); private static final String TAG = "HelloWorld"; @Override protected void onCreate(Bundle savedInstanceState) { super.onCreate(savedInstanceState); setContentView(R.layout.activity_main); context = this; setRequestedOrientation(ActivityInfo.SCREEN_ORIENTATION_PORTRAIT); rlContainer = (RelativeLayout) findViewById(R.id.rl_container); viewContainer = (TextView) findViewById(R.id.view_container); viewText = (TextView) findViewById(R.id.text_view); viewCustom = (TextView) findViewById

Q: Find the limit as $x \rightarrow \infty$ of $\frac{1}{x^2\sqrt{1+x}+1}$ I want to find the limit as $x \rightarrow \infty$ of the following $\frac{1}{x^2\sqrt{1+x}+1}$ I've tried multiplying both the numerator and the denominator by the conjugate but it didn't help... Any ideas of how to approach this? Thanks! A: Hint First notice that $\frac{1}{x^2\sqrt{1+x}+1} = \frac{1}{\sqrt{1+x}+x} - \frac{1}{\sqrt{1+x}+x\sqrt{1+x}}$ so $\lim_{x \rightarrow \infty} \frac{1}{x^2\sqrt{1+x}+1} = \lim_{x \rightarrow \infty} \frac{1}{\sqrt{1+x}+x} - \frac{1}{x\sqrt{1+x}+1}$ Can you now finish it from here? A: I think it is better to write $x^2\sqrt{1+x}+1 = x^2(1+x)+1 = x^2+(x+1)^2 \rightarrow 2$. So, the limit is $\frac{1}{x^2\sqrt{1+x}+1} \rightarrow \frac{1}{2} - \frac{1}{2x} = \frac{1}{2}$ The influence of substrate and inhibitors on the degradation rate of polystyrene in-vitro. The degradation rate of polystyrene (PS) particles was determined as a function of the polymer load and in the presence of common organic and inorganic inhibitors. First, the degradation rate of PS particles in an aqueous solution was determined at 37 degrees C with a single-compartment batch reactor system. From this experiment, it is shown that the degradation rate of a PS particle in water is linearly dependent on the polymer load and the second order rate constant of degradation is found to be 4.8×10^{-7}
