Shotcut is a simple and user-friendly video editor that offers a series of features and functions to help you adjust and retouch your favorite movies, in just a few clicks of your mouse. The application supports various video, audio and even image formats, so you can work with any type of media you want. The 'Multi-format Timeline' enables you to mix and match resolutions as well as framerates throughout an editing project. You can analyze the video frame by frame, allowing you to correct or enhance its every aspect. Another interesting feature of Shotcut is the fact that it opens and plays MLT XML as clips, so you can even use this application to test such files. In addition, Shotcut allows you to create and play MLT XML playlists, that you can easily encode or stream to a preferred network. The application also provides you with a number of video filters, such as 'Blur', 'Color Grading', 'Crop', 'Glow', 'Mirror', 'Rotate', 'Saturation', 'Sharpen', 'White Balance' enabling you to fully customize the appearance of your movie, while the 'Color Wheels' can be used for color correction and grading. Moreover, Shotcut enables you to work with a set of audio filters, namely 'Balance', 'Gain', 'Pan', that can prove useful in adjusting several sound issues in your file. The 'Encode' component makes it possible for you to convert your video to numerous output formats, such as M4A, MXF, VOB, FLV, MP4, M2T, MPG, AVI, MOV, OGG, WEBM, and others. After finishing with the various editing processes that you want to perform on your video, you can stream it using the network protocol scheme, address port and parameters as an URL address. Shotcut is a comprehensive and efficient media editing tool that offers basic as well as more complex functions, some of which go beyond those of many similar applications, that you can use with confidence. Shotcut Features: Timeline - offers a multi-format timeline that's separate for each track (video, audio, image, or subtitle) allowing you to change resolution, framerate, and background color to create a customized timeline for the project. H.264 - Shotcut supports several types of H.264 and AVCHD (MPEG-4 Part 10) encoded files in several different qualities.

Keymacro allows you to create shortcuts for the most used keyboard shortcuts in your applications. For example, if you want to bypass the 'New Window' command in your web browser, you can simply bind the 'Ctrl+N' to the Shortcut "New Window", leaving 'Ctrl+T' to do a different action. This application can be set up to automatically bind any keyboard shortcut you want, as well as to have an adjustable delay period before these keys are recognized and executed. Keymacro also enables you to automatically bind any combination of keyboard keys, enabling you to create shortcuts for any action you want, such as "Ctrl+Alt+Del" for rebooting your computer. To configure this application, all you need to do is log in to your web site using your Yahoo ID and set the various options you want, including the delay period before key combinations are recognized. NOTE: If you use this software to create Shortcuts for "Windows"-key combinations, make sure to open the following folder: C:\Documents and Settings\YOURUSERNAME\Application Data\Yahoo\Yahoo! Shortcuts. KEYMACRO History: Version 1.0.0.1 - First release. Known Problems/Wish List: * It should be possible to customize the keys to rebind to the Shortcut "New Window". * It should be possible to have the delay period be customized by the user. * It should be possible to have the delay period be based on the duration of the Shortcut "New Window". * It should be possible to set the keyboard shortcut for rebinding to the Shortcut "New Window" with a delay period. * It should be possible to have a delay period of 0 to automatically rebind. * It should be possible to be asked when a new Shortcut is created. * It should be possible to set the delay period before rebinding to the Shortcut "New Window" to be a custom value. * It should be possible to check to see if the Shortcut is already rebinding to the Shortcut "New Window". * It should be possible to set the delay period before rebinding to the Shortcut "New Window" to be a custom value. * It should be possible to be notified when a user edits a Shortcut and clicks on the update button. * It should be possible to disable the Shortcut "New Window" action. * It should be possible to 1d6a3396d6
