
Free Partition Manager

Do you want to open programs faster and in general have your PC run faster? Do you want to move all the programs that you no longer use to a separate partition? Do you want to combine two or more partitions into a single partition? Do you want to create a partition so that you can extend your Windows partition? This is the sort of task Free Partition Manager is perfect for. The program offers a multitude of features that enable you to modify partitions and explore their contents. Free Partition Manager can copy, move, resize, merge, check partition type, clean up and add the file system. Other features: • Resize, Move, Copy and Delete partitions; • Check the partition type; • Clean up and free up space; • Partition information; • Defragment the drive; • Create partitions; • Split partitions; • Remove partitions; • Change the format of the partition; • Combining partitions; • Combine partitions; • Split large partition into several parts; • Show statistics; • Save partitions; • Merge partitions; • Check partition; • Shrink partition; • Check the free space on your partitions; • Change size of the partition; • Check errors in the partition; • Change the label of the partition; • Enable/disable the partition; • Check the used space in the partition; • Copy the partition content to another partition; • Clean up and free up space on your partitions; • Check the partition type; • Clean up and free up space on your partitions; • Delete the partition; • Hide the partition; • Hide the partition that contains the files; • Sort the list of partitions; • Hide the hidden partition; • RTFM; • Display the Partition Manager window; • Display the Properties of a partition. Soft1Soft free partition manager is a great program that allows you to resize and move partitions on Windows operating systems. The main purpose of this tool is to provide you with the ability to split a big partition in order to have an adequate amount of free space on your PC. The program is light and easy to use, so you can resize or move partitions without even thinking about it. For example, after you launch the program you will be offered to choose the drive you want to work on, after which you will be able to choose between moving, resizing, copying, merging
