"Memozine Description - A lot of people like to keep track of their daily routines to try and improve themselves in the long run. Memozine is an application that can help you with cataloging a wide range of items, starting with a diary and ending with lists of books, places or even individuals that are important in your life. Compact GUI The main window of Memozine is minimalist and compact, and it remains docked to the left or right side of your screen, as you choose. While it might take some time getting used to seeing it on your screen (you cannot minimize its main

window to the taskbar or the system tray), this helps you keep all of the app's components within reach. Comprehensive diary You can begin by writing down your thoughts and feelings in a diary, then personalize the text by changing the font type, size, color and formatting. You can insert images, as well as numbered or bulleted lists. Furthermore, you can group your diary entries according to their importance (ranges between exceptional, high, significant, moderate and ordinary) or to the categories they deal with (such as General, Home, Work, Travel, Friends & Family, and so on). An interesting function of the diary component of Memozine is setting up statistics related to your daily life, such as bed time, wake up time, hours worked, weight, alcohol units, distance

cycled or driven, and many more. Create item inventories Memozine can also be used as a means to organize collectible items, places of interest or activities you perform on a regular basis. Adding information to this database might take some time, but once you are done, you can easily search for specific entries or add them to the daily statistics. Conclusion To wrap thing up, Memozine can provide you with an exhaustive solution to keep a no-frills diary without missing out on the functionality. You can also set up inventories for whatever item you might require." Documentation Memozine Website Memozine Source Code: "Quran Sound Recorder: Voice Quran Pro
