Quick Recovery - Power User Version 1. Import Library to analyze the selected image

After the Quick Recovery process is started, you will be presented with the 'Import Library' option. After selecting the library, you can import the library that you already have created and configured in the 'Import Library' tab. Import Library gives you the following benefits:

- o It is easy to add the analysis to the file.
- o It also gives you the option to choose the analysis method.
- o It also shows you the image list.
- o You can also select the files and folders for analysis. You can choose from the following methods for selecting the images for analysis:

1. Open the "Import Library" tab.
2. Select the Import button and select the folder where you want to store the analysis.
3. Select the Import button and select the import library

file. 4. You can also select the type of analysis to perform and the folder to which the analysis results will be stored. 5. Select the Import button and you are ready to import the library for analysis. 6. You can check the analysis results in the 'Import List' tab. After you have analyzed the images of the folder you have selected in 'Import Library', you can select any of the results and analyze them by clicking on 'View' tab. You can get the following options in the 'View' tab: 1. Selection of the images that were analyzed in the library. 2. View Image details. 3. Copy Image
