invention relates to a new and distinct cultivar of Petunia plant botanically known as Petunia×hybrida and hereinafter referred to by the cultivar name 'Balsnijdtose'. The new cultivar originated in a controlled breeding program in Arroyo Grande, Calif. during May 2001. The objective of the breeding program was the development of Petunia cultivars with numerous single-type flowers, unique flower coloration and a moderately vigorous, mounded-trailing growth habit. The new Petunia cultivar is the result of cross-pollination. The female (seed) parent of the new cultivar is the proprietary Petunia×hybrida breeding selection designated 559, not patented, characterized by its medium red-colored flowers, medium green-colored foliage, and vigorous, mounded-trailing growth habit. The male (pollen) parent of the new cultivar is the proprietary Petunia×hybrida breeding selection designated 633, not patented, characterized by its light blue-colored flowers, medium green-colored foliage, and moderately vigorous, spreading growth habit. The new cultivar was discovered and selected as a single flowering plant within the progeny of the above stated cross-pollination during February 2002 in a controlled environment at Arroyo Grande, Calif. Asexual reproduction of the new cultivar by terminal stem cuttings since February 2002 at Arroyo Grande, Calif. and West Chicago, Ill. has demonstrated that the new cultivar reproduces true to type with all of the characteristics, as herein described, firmly fixed and retained through successive generations of such asexual propagation. Insgesamt 20 Menschen werden nach Überlebenschancen, nämlich sieben Punkte, bewertet. Nach meinem Dafürhalten sind die Aussagen unglaubwürdig. Unzweifelhaft sollte der vorgesehene Kommentar über eine Untersuchungsgruppe des Verwaltungsgerichts Berlin (VGB), die die Bau- und Sanierungsbetriebe beauftragt hatte, unterstrichen werden.
