* This is an online installer that you need to download and install manually. This is a offline installer for Mac OS X. * Register this online installer for free.Q: How to create a custom field and pass it to another activity I am trying to create a custom field and pass it to another activity. I have created a custom field. In my onclick it shows the toast msg but not the value. I am calling the intent from onclick of the button. public class MainActivity extends Activity { TextView tv; Button btn; @Override protected void onCreate(Bundle savedInstanceState) { super.onCreate(savedInstanceState); setContentView(R.layout.activity_main); tv=(TextView)findViewById(R.id.tv); btn=(Button)findViewById(R.id.btn); btn.setOnClickListener(new OnClickListener() { @Override public void onClick(View v) { // TODO Auto-generated method stub int i = Integer.parseInt(tv.getText().toString()); Toast.makeText(getApplicationContext(), i, Toast.LENGTH_SHORT).show(); Intent i = new Intent(MainActivity.this,MenuActivity.class); i.putExtra("counter",i); startActivity(i); } });

What's New in the RegExp Download Organizer?

RegExp Download Organizer is meant to simplify the task of organizing your Downloads folder by providing meaningful subfolders for each download thread you start when using Google Chrome. It's easy to create and edit add-on rules, and you can also export them to JSON files. Import the add-on rules, synchronize them to cloud storage, and use them on other computers that you are logged in to. The rules could be useful for those who need to organize the files in their Downloads folder and those who are looking for a way to automatically create meaningful folders for each download thread. More information is available on our website. RegExp Download Organizer Changelog: Version 0.1 - Initial release.
