Arclab Thumb Studio Registration Code Download [Win/Mac]

----- Arclab Thumb Studio is an easy-to-use image gallery, thumbnail, slideshow and web album creator for everyone. It also allows you to convert your web-site visitor's browser to fit his screen size, and enhances your pages with large photos and noticeable buttons. As a thumbnail gallery, it creates high quality thumbnails for your images that are also responsive to changes in screen width. Creating a thumbnail gallery is easy. Just drag and drop your images onto the "Gallery" area, and Arclab Thumb Studio does the rest. With a simple click of a button, you can convert your images to the best of the best. With one click, you can create full size images in JPG, PNG, GIF, PSD, BMP, ICO, WMF and several other popular image formats. If you want to convert a page into a web album, you have to add several buttons and menus. You can also create a highly customized thumbs display for your web album, or even insert it directly into your existing HTML page. Thumb Studio's interface is very intuitive. You just click and drag your photos and Arclab does the rest for you. It allows you to insert your photos into your existing web page, and you can add as many photos as you want, or leave empty slots for later. Just make sure you go down a few rows after you added the page so you can see your photos. To create a watermark, simply select it and use it as a template. You can then adjust the appearance and you can even change the size, opacity, spacing and color. Since Thumb Studio is HTML compatible, you can add the album to any HTML page. You can use any HTML editor to create the page. Thumb Studio can also add custom tags, and you can add text, background-color, color, gradient, and padding to your thumbnails. Ideal for webdesigners, photojournalists, amateurs and even professional photographers. Arclab Thumb Studio Features: ----- - Auto thumbnail for thumbnail gallery, slideshow and web album - Thumbnails responsive to resize the browser - Full size image conversion - Watermark for JPG, PNG, GIF, BMP, ICO, PSD, TGA and many other formats - Can add custom tags - Add my own texts - Convert Images To JPG, PNG, GIF, PSD, BMP, ICO, WM
