Cloanto Amiga Forever 2017 -  
2018 Windows VersionQ: Spee  
chRecognition.Recognize()  
throws system.out of memory  
error I'm working on a C#  
project and i'm using  
SpeechRecognition (Windows  
Presentation Foundation) to  
recognize speech. The program  
works fine until the first time  
that you call SpeechRecognitio  
n.Recognize(). I've been  
looking for a solution for the  
past 2 days, but i have yet to

---

find one. Here is my code :

//TextBoxB.Text and

TextBoxC.Text are set to

"Audio"

SpeechRecognitionEngine

engine = new SpeechRecogniti

onEngine(false); engine.LoadG

rammar(GrammarPath); engine

.RequestRecognizerUpdate();

engine.SpeechRecognized +=

new EventHandler(engine\_Spe

echRecognized);

engine.SpeechDetected += new

EventHandler(engine\_SpeechD

---

ected); engine.RecognizeAsync(RecognizeMode.Multiple, SpeechRecognitionRecognitionCollection.FromStream(SpeechStream)); TextBoxB.Text and TextBoxC.Text are the microphone inputs. The error message that I get is : An unhandled exception of type 'System.OutOfMemoryException' occurred in System.Speech.Recognition.dll I don't really know what to do. I have a 2 GB RAM desktop,

---

and I don't know how to fix it.

A: You need a larger memory allocation than you have. Try changing this:

```
SpeechRecognitionEngine  
engine = new SpeechRecogniti  
onEngine(false); ... engine.Rec  
ognizeAsync(RecognizeMode.  
Multiple, SpeechRecognitionR  
ecognitionCollection.FromStre  
am(SpeechStream)); to this:
```

```
SpeechRecognitionEngine  
engine = new SpeechRecogniti  
onEngine(false); ... engine.Rec
```

---

ognizeAsync(RecognizeMode.  
Multiple, SpeechRecognitionR  
ecognitionCollection.FromStre  
am(SpeechStream)); Also, do  
you really have 2GB of RAM?  
I have trouble running your  
code with even 1GB.

Dinucleotide excision repair is  
essential for multicellular
