## What's New In?

Use AutoCAD's Markup and Map Assist tools to send feedback from paper documents and presentations or the Web directly to your CAD drawings. Apply the changes to your drawing in a single operation, without the need to open and close multiple documents or repeat the same steps over and over. (video: 3:30 min.) Drafting Components: Create the Drafting Components that you need to complete your work in an organized manner and with fewer work steps. New Drafting Components make it easy to use different symbols or your own symbols for different purposes, such as fonts for text, line styles for lines, arrowheads for arrows, or custom line weight for border line. (video: 2:30 min.) Add your own organization of symbols and tools on the Drafting Components palette. You can group and filter Drafting Components by type and orientation, and organize Drafting Components by page, layer, or layer group. (video: 1:50 min.) Organize your symbol list by category. Use groups of symbols that are similar in appearance or functionality to quickly find the right symbol. Use the Drafting Components Organizer to sort Drafting Components by page, layer, or layer group. (video: 2:00 min.) Create a drawing template with the symbols and tools that you use most often. Create a template for each drawing project, and quickly create a new template based on the previously defined template. (video: 3:50 min.) Create a new drawing based on an existing template or create a new template for a new drawing. (video: 1:25 min.) Open and Save: Work collaboratively and open and save projects in the cloud. Communicate and share projects online with Microsoft Teams. Click to share your work with others and use Office Online to work together with others, regardless of which programs they use. (video: 2:45 min.) Goto Drawing is the new goto command for 2D drawings. It works with any tool, not just the pen. The Goto Drawing command brings the currently selected object to the front. It is similar to the old Draw To command. (video: 3:50 min.) Drawing components are now more fully supported in AutoCAD. New features include: Rename an existing drawing component, or move it to a new drawing. (video: 2:15 min.) Save the properties
