This add-in is perfect for those who use the keymacro functionality of Microsoft Visual Studio. The macro definition dialog is provided as a visual preview of the defined macro. The definition can be edited at any time. KEYMACRO Search text on the clipboard dialog is provided to easily copy and paste a text into the editor. KEYMACRO can be integrated into other add-ins by use of the keymacro add-in as a reference. The keymacro project can be downloaded here: How do I use it? 1. Remove the standard scroll bar from the Text Window by adding the following snippet to the.reg file located under: HKCU\Software\Microsoft\VisualStudio\10.0\SSDT\Options\ToolsOptions\TextEditor CODE Or if you have a more advanced configuration of the scroll bar, the option is available in the Preference page: Tools -> Options -> Environment -> Text Editor -> Scroll Bar 2. Copy the following snippet of code into the Preference Dialog by double clicking it. The following code will replace the standard scrollbar. CODE 3. Drag the file from step 2 into the source directory of your add-in. For example, you can find the keymacro.reg file in the following location: C:\Program Files (x86)\Microsoft Visual Studio 10.0\VSTS\Package\PackageTmp\VS.pdb\2010\VisualStudio.Provider.AddIns\ 4. Press Apply or Ok. 5. If the preference dialog does not appear when pressing the Apply button, refresh your add-in. 6. After you have installed the add-in and activated it, you can find the keymacro preferences in the following location: Tools -> Options -> Environment -> Text Editor -> Scroll Bar Note: To access the keymacro preferences, simply double-click the keymacro.reg file on the Add-In bar. The keymacro scrollbar is not working when running VS2010 on x64 bit systems. The only way I've found to make it work was to edit the.reg file by hand and change keymacroDefaultScrollPosition = "0 0" to "0 40". The text is not being pasted when 77a5ca646e
