are PDF, DOC, XLS, PPT and PPTX. This application is really easy to use and lets you grab images from the clipboard, take a picture of it, make annotations, print it and save it to your OneDrive. You can then share it to Facebook, Twitter, Email, or any other apps that can accept images. There are some minor issues with the program, however. The most annoying one, for example, is that you can only view images from a web page, but there's no option to grab them from any specific app, such as your Dropbox or Google Drive. Also, the whole process of saving files to the cloud takes a long time. The best thing about Office Lens is that it doesn't require any additional software, so it's easy to use and doesn't require complicated steps.
