SubtitleDownloader Crack With License Key [Win/Mac] [Latest-2022]

SubtitleDownloader is a Java-based application that can help you search for and download subtitles from different websites. The user interface is clean and all its options are neatly displayed in the main window. The search process can be carried out by specifying the movie title or iMDB ID, version and language. From the left side of the panel you can select or deselect the sites where you wish to search for subtitles. At the end of the search procedure, you can view details about each subtitle, such as poster image, movie title, FPS, subtitle website, language, number of CDs and DVDs and IMDB ID. The application is also able to download and unpack ZIP and RAR archives. Another important feature that is worth mentioning is the possibility of making SubtitleDownloader automatically search and download subtitles for multiple movies. In order to proceed with the automatic process, you are required to specify the directory that contains the video files. You can also set the minimum video file length to search for, pick the language, and set other parameters. You can download either the selected subtitles or the entire list, and it is also possible to rename the files. Changing the looks of the application is particularly simple, as you can select from different themes available. It is possible to apply file name filters for accurate search results, and you can select one from a preset list (DVDRIP, XVID, HDTV and others), as well as add your own filename to the list. The application keeps a log which contains information about your current searching options, as well as possible errors. In conclusion, SubtitleDownloader proves to be a handy software solution that facilitates the entire process of downloading subtitles from different sites. It's easy to work with, and appeals to beginners and professionals alike.
