The sky used in this image was saved in ISO-2 format from my Canon 350D camera. After combining the various tones in ACR using the Midtones/Hue tool, I imported the image into PS5 and applied the following adjustments: Grain Clarity Contrast Black point Clarity Sharpen The sky was then resized to 1280x800 pixels using a professional photo editing program (Photoshop CS6) and Gaussian Blur was applied to soften the edges of the image. (+) Tip: Using a Gaussian blur on a dark background makes it look fake. So instead of using it, take an image in RAW format from your camera and use that as the background image. Drunken Monk I have used several photographs as wallpaper in my time. I could use loads more, but I have always been drawn to those with a nice pixalisation. The Drunken Monk is one of my favourites. It was one of the first freeware windows wallpapers I ever made. It has an amazing antique style and the blue photo often used for wallpapers just makes it extra special. Hope you enjoy it as much as I do. (+) Tip: Working with a large panel of the desktop allows you to make large changes at once, making editing a wallpaper easier. Four Seasons an homage to the famous Jackson Pollock painting; the browns of Autumn, the greens of Spring, the blues of Summer and the reds of the Winter brings you the photo to change your desktop. I first made this theme for my wife a year ago and love it every time she glances at her desktop. (+) Tip: Using a large panel of the desktop makes it easier to edit a wallpaper. The scene shown here is a screenshot of a panoramic image made using the Gimp, using the much improved version of "PanoramaEdit" Beach Wedding - A relaxing summer scene where the small waves are washing over the sand. The colours of the sea, sky and sand are realistically depicted and add a lovely atmosphere to this high quality image. I think it would make a great desktop background. (+) Tip: You can edit the sky in PS or Photoshop to make it look more realistic, or use a professional photography program such as Photoshop to make the same change. Shipwrecked - My ability to use Windows Media Player has remained dismal over the years. I never used to care what the default screen saver was, 09e8f5149f
