System Requirements For Project Kaiser:

To play on PC, there are no strict specifications on the CPU speed, RAM, or graphics card, but they should at least be able to run the game at a fairly moderate setting. There are no pre-requisites on what video card you should use, and most modern video cards will be able to run the game at a fairly decent framerate (it's aiming for 30 FPS). While this game will require a reasonably modern video card to play at a decent framerate, it will play on most all of the earlier and even many of the later generations of video cards.
