Restore the Power of Your Computer's Keyboard with the Right Keyboards No matter which setting you're comfortable with, there's an option for you in this category. Standard Keyboard Input With the standard keyboard input set, input is done solely with the standard keyboard. While this option is very convenient, often computer users end up with much slower typing speeds due to the additional keys and functions of the standard keyboard. Cable-Control Keyboard Programmable... and fast. The USB-A to USB-C cable switch on the cable-control keyboard lets you connect your USB cables in one direction and use the computer in the opposite direction, so you can adapt to different devices, people, and environments. High-Speed Keyboard When typing fast, you need the fastest type of keyboard. The High-Speed Keyboard is designed to offer your ideal typing speed by introducing mechanical keys that actuate with the speed of lightning. With high typing speed, it provides error-free and comfortable typing. . Keyboards are designed with human factors in mind, so they're intended to be used by the same people over the same period of time. For the best durability and longevity for your keyboard, do not wear or use it for more than 50 hours at a time. Use all your fingers to type. The ultra-thin design makes your fingers move without effort, providing the fastest typing speeds possible. The curved corners and raised edges protect your fingers from any wear or damage. Take your desk for a walk. Use the keyboard stand to
