KeyMacro is a dictionary extension that provides instant definition of words and short phrases by pressing a predefined button on your keyboard. KeyMacro Dictionary is a dictionary extension that is developed to easily provide instant definition of words and short phrases by pressing a predefined key on your keyboard. It also allows you to see an example sentence for the word that you are looking for. It is created by TecnoKey and is free to use. This dictionary extension provides instantaneous definitions of a word you type in the Google search bar by pressing a predefined key on your keyboard. There are two types of keys available: Predefined – A key on your keyboard that can be customized and then you can assign a different meaning to it, such as "1" for the number one, "m" for the word "mild", "g" for "good" or "d" for "define". Custom – Allows you to set the name of the key that you want to use, such as "F1", "shift+F1", "q", "h" or "command+h". The definition of the word that you are looking for appears when you press that key on your keyboard. Dictionary definitions with instant translations It is also possible to get an instant translation of a word that you type in the Google search bar by pressing a predefined key on your keyboard. In this case, it is necessary to have the browser set to allow the execution of files with a ".http" extension (such as a.txt,.html,.php or .asp file). This can be done by clicking "Settings" -> "Content Settings" -> "Default Content Settings" -> "Execute file types" and selecting "All files with a ".http extension" on a non-Excel or non-PowerPoint file. Additional Features: Create your own list of words that can be used for automatic translations and definition of words you type in the Google search bar. KeyMacro includes a great set of examples of what each key means. You can also add a description of the key. This is important because it helps you recognize the key you want to assign for instant translations, since there are many different keys on a keyboard that you can use for the same purpose. Dictionarist is an online service that can offer quick word definitions and instant translations between a number of languages, as well as example sentences that help you understand how words are used in certain contexts. If you are a Chrome user, the Dictionarist browser extension makes the service even easier to access, as you can just double-click a word on a web page to view its definition or translation. Multiple languages are supported, and the extension is very intuitive. Small extension that can be set up easily Once you've added it to Chrome, you will need to configure the extension's behavior. By default, the definition or translation is displayed when you double-click or select a word or phrase, but you can add a trigger key to keep them from being displayed accidentally. Dictionarist can provide simple word definitions or translate them between English and a number of other languages. You can select the dictionary to be used from the extension's options. Get definitions and translations with a couple of mouse clicks The extension does pretty much exactly what the description says – when you double-click a word, its definition or translation will be displayed in a new window, and you can even listen to the word being spoken. When it comes to translations, Dictionarist also provides you with several example sentences that can help language learners figure out how the words are used. You will probably notice that the extension also adds an icon to the Chrome toolbar. If you want to view the definition of a certain word, or generate a translation, simply click the icon and paste or type it in the search field. Straightforward, well-designed dictionary extension for Chrome Overall, Dictionarist is one of the best extensions of its kind available for Chrome, so it is most definitely worth a try. It supports a number of languages, so it is great for both translating words and getting English definitions.
