Visit Scribd for more information about the digital library: Overview Scribd Uploader is a lightweight software application whose sole purpose is to help users upload documents on the well-known digital library, Scribd. It boasts a clean and intuitive layout that allows you to perform most operations with just a few clicks. In order to access the program's functions, you are required to provide details about your Scribd account. Scribd Uploader gives you the possibility to upload multiple documents, edit each file in terms of title, tag, and a short description, as well as mark the selected item as private or make all documents private. Other notable characteristic allow you to view details about each file, such as name, title, size, and location, add or remove documents from the list, edit metadata, as well as view the total number of items. Since it doesn't require much computer knowledge to work with this tool, even rookies can master the entire process with just a few clicks. During our testing we have noticed that the program carries out a task very quickly, and no errors showed up throughout the entire process. As it would be expected from such a small utility, it remains light on system resources, so it doesn't burden the overall performance of the computer, nor interfere with other programs' functionality. To sum things up, Scribd Uploader offers an intuitive layout and

What's New In?

Simple, easy to use and very user friendly Support to upload multiple files at once Support to view details of files such as size, dates, tags, titles etc. Support to preview files online in real time View files details and metadata Support to remove files from list Share your files online to your favorite social networking sites Notifications about files update Great way to store your files online Scribd Uploader Screenshots: "The first thing that I liked is that the program has a very intuitive layout. The interface is really easy to use and anyone that has a basic knowledge of computers can use it. The program supports several useful functions, such as the ability to upload multiple files at once, view details about each file such as size, title, tags, etc., add or remove documents from the list, edit metadata, as well as view the total number of items. All these features are placed on the left side of the window, which makes it easy to find. The program also has a clean and well-designed interface, and it looks great on both Windows and Mac systems. However, the program doesn't show any details about your files while they are uploading, so you have to click the Open button in order to view them. Even so, the program is extremely easy to install and doesn't require much computer knowledge to work with it. If you want to learn more about this utility, you can read the manual that is placed on the official website. Overall, Scribd Uploader is a very simple, easy to use application with many useful features that will definitely be appreciated by people that want to upload and share files online. " I got Scribd Uploader to upload a large number of files. I was able to select a specific number of documents to be uploaded and it worked flawlessly. It is very easy to use and has a bunch of useful functions. Highly recommended! This app works exactly like the site. It is very easy to use and allows you to upload and remove files. I love the fact that it allows me to rename and share any file online. I hope that the price is reduced as it is expensive for what it does. I would recommend it to any Mac user.
