aa\_dima2 Modified version of the original map "aa\_dima" with minor changes. Changes include.

1. Water bug fixed.
2. CT-Tower added without interference.

I remember there used to be a very simple map called aa\_dima which I have loved since I was . But I found this modification and it is definitely better than the original. You can install aa\_dima2.nfo in the root directory of the game. I also decided to leave the map in . To do this, I placed the map in the

root directory of the game and overwrote the .nfo file with vfat -r aa\_dima2.nfo. When you start the game, the map will work even if you don't have the .nfo file. If the map is working, restart the game for it to work properly. Note: this is a modification, so it will not work on other versions of the game.
