But this framework has been changing rapidly, and it's time to see how the role of the editor is evolving when making a TV show or film. Join us as we look at the importance of editors in the post-production process, with a little help from the industry's top editors. In this talk we will cover some of the key questions to ask when judging an editor's services and look at some of the skills needed for this increasingly important role in post-production.
