lighting designQ: Bash: how to make it
more portable? I know that if you
know how to do it in bash, it will work
everywhere. So, how can I make my

bash script more portable? I'm not referring to using POSIX compliant shells. I want to make it run in any environment. So it should run in the system with POSIX compliance, on AIX, Solaris, etc. Thanks. A: Make it easy on yourself, and use POSIX-style tools. `#!/bin/sh # just make up any name read -t 10 -r -n1 printf 'This is me now: %s ' "$USER" a1d647c40b`
