
Ail Set Stream Volume 8 Gta Vice City NEW!

[Download](#)

procedure entry point `_AIL_set_stream_volume@8` when I play GTA Vice City it says the procedure entry point is Computers & Internet question. I tried with Windows XP and it still says it was on Windows 2000. To me it looks like Windows 2000 uses C# for everything related to sound, so I suspect this is not the issue. I also added some .dll files to the Windows 2000 folder and found this .dll in the same folder. Does anyone know why this is happening and is there a way to turn it off If you want to avoid it, you will need to install Windows XP SP3 as there is a "bug" otherwise.
