
UsbFix 8.248

[Download](#)

UsbFix 2016 8.248 UsbFix is a free malware removal tool that helps you detect and remove infected USB drives, flash drives or any other removable USB devices. UsbFix can be run in manual or automatic mode without additional warning. The program scans all files that it finds on removable media for the presence of malware, and then displays a list of infected files and offers to delete them. If the list contains only "safe" files, they will be automatically deleted, and if there is any doubt, the program suggests checking the files with an antivirus before deleting them. The program removes the following viruses:
