KISS Player is the best Windows application for karaoke because it allows you to play your favorite audio files. This music player is also the ideal solution for voice recording. Straightforward interface As the name of the player suggests, KISS Player, which is an acronym for Keep It Simple Stupid, the graphic interface of the application is basic and uncomplicated. The best part of plain interface is the low system requirement footprint, making KISS Player an ideal music player for older machines, and of course, for those who want to keep it simple. The layout of the application is neatly organized in two panels – the left side is constituted of a scrollable playlist displaying your audio files, the right side being reserved for the lyrics of the songs. The preset colors of the interface of KISS Player can be changed from dark tones to the desired chromatic theme. You can customize the color of the text, the selected playlist items or the background, allowing you to obtain the preferred combination of tones. Lyrics integration As soon as a song starts to play, the application automatically searches the Internet for its lyrics, which will be displayed in the right side of the playlist. Sometimes, KISS Player cannot find and display the words for every melody, this feature being efficient only with popular songs, with lyrics on the Internet
