Add the ability to export and import M-Files (Drawing Markup language files). (video: 1:45 min.) Search and replace text and graphics with text and graphics from a searchable and replaceable M-File. (video: 1:12 min.) Import 3D models to your drawings using the new M-File Import module. Import from STL, OBJ, and DAE files. (video: 1:45 min.) Create Drawings from a.DWG File Add comments, draw guides, and annotations to your drawings. Annotations can be placed on specific points or the entire drawing. The new Comments and Guidelines option allows you to add comments and draw guides to your drawings. The new Offset tool allows you to offset a drawing for a specific distance or proportionally based on the drawing frame. Architectural Profiles: Leverage 3D models from CAD systems like Revit and AutoCAD Architecture. Any changes made to your Revit model in Autodesk® Revit® 2019 will automatically be reflected in the AutoCAD Architecture models. Add your AutoCAD Architecture model to your project in Revit and add revisions. Any changes to the AutoCAD Architecture model will automatically be reflected in your Revit project. (video: 1:39 min.) Built-In Digital Terrain Modeler (DTMs): Modify elevation and other geometric information to depict geography. Includes 2D and 3D views to show topography, hill shading, shadows, and tree coverage. View the 3D digital terrain with a variety of viewing modes, and map the elevation of the surface in a variety of ways. The new Digital Terrain Modeler has a 3D viewer that allows you to quickly visualize the elevation of your design in many different ways. (video: 2:03 min.) 3D Terrain Editing: Modify the height of your design surface in 3D. Use the new Surface modifier to create and edit 3D surfaces to control the height of your designs. (video: 1:26 min.) Modify your design without opening the model to select and edit your surface. (video: 1:09 min.) Move objects, swap materials, and create variations of surfaces. (video: 1:32 min.)
