MSN Messenger Sniffer allows you to capture messages on any computer with an MSN Messenger Service installed and record them on the local disk or to the network share on your local network. MSN Messenger Sniffer is able to capture any public file transfer between users of the MSN Messenger Service and automatically relays the captured messages to the MSN Messenger Service user on the monitoring computer. MSN Messenger Sniffer records and logs all MSN Messenger activities, including file transfers, chat conversations, invites, files downloaded from the Internet and any other feature that is accessible through the MSN Messenger Service. After you have recorded your MSN Messenger Service usage, you can analyze any log file and check your employees or children's Internet activities. The information collected is stored on the local disk and on the network share or the FTP server. MSN Messenger Sniffer supports almost all MSN Messenger Service features, including the File Transfer, Chat, Voicemail and Settings operations. MSN Messenger Sniffer is the ideal tool for tracking and monitoring any MSN Messenger Service usage that you think should be restricted or should be watched carefully. Features: * Support all Windows versions. * Support any MSN Messenger Service. * Supports all MSN Messenger Service features, including the File Transfer, Chat, Voicemail and Settings operations. * Recorded messages are stored on the local disk or on the network share. * Supports a wide range of encryption technologies. *

Supports multiple users. * Supports Windows 2000 and Windows XP. * Supports Windows XP. * Supports Windows 2000. * Supports Windows Me. * Supports Windows NT and Windows 95. * Supports Windows 95. * Supports Windows 98. * Supports Windows 7 and Windows Vista. * Supports all Windows versions except Windows 9x. * Support a wide range of compression technologies. * Supports JPEG, GIF and BMP. * Supports all image formats. * Supports PNG. * Supports MP3, WAV, WMA, OGG and AVI. * Supports MMS format. * Supports H.264/AVC. * Supports QuickTime. * Supports MPEG-4. * Supports FLAC. * Supports AAC and MP3. * Supports WAV. * Supports RIFF. * Supports AVI. * Supports WMV. * Supports MOV. * Supports 3GP. * Supports JPEG

What's New in the?
