[Ocular manifestations in patients with celiac disease: a study of 100 patients]. This is a retrospective study of 100 patients (105 eyes) with celiac disease seen from March 1991 to March 2000, examining ocular lesions and their influence in the quality of life. The diagnosis was based on the presence of hypothyroidism, diarrhea and/or weight loss, positive results of specific antibodies and gastrointestinal endoscopy showing chronic diarrhea and mucosal atrophy. The main affected ocular symptoms were dry eye (89.7%), epithelial tear film (89.7%), conjunctival hyperemia (85.2%), epiphora (83.3%), photophobia (73.3%), and blurred vision (52.9%). However, most of the patients had a normal visual acuity (87.8%), and only 29.5% of the patients had strabismus. Thus, ocular lesions in celiac disease are common, affecting the quality of life of the patients. They may be a cause of dry eye, which should be treated, and may interfere with

visual acuity. Matzah ' Matzah, or unleavened bread, is often made from wheat, but also may be made from rye, corn, or other grains. Matzah has a crisp taste and texture. Matzah may be used as a snack, a base for desserts, a main dish, a filling, a topping, or any of many other ways. Matzah Braid ' Matzah Braid is a special and fun way to eat Matzah! Serve it on a party platter for everyone to do. The dough is spread out on the table, and each person takes a piece. Then each person cuts a line across the Matzah, then folds the Matzah into a braid. This recipe makes about a dozen braid cookies, but they may be adjusted to the number of people at the party. Matzah Wreath ' A very tasty way to serve matzah! The dough is cut into strips and put into a muffin tin. Then each person takes a strip

This topic explores different notions of ethics, and related issues of internet usage for young people. Students' internet use and habits are a hot topic for educators and parents alike. If you are a student, you probably can't avoid using the internet. At the same time, however, you are in the middle of what is probably the

most controversial and confusing subject area in our society. How should you use the internet? This is not a "youth matter", nor is it a trick question. It is one of the main concerns of society as a whole. Your ability to identify with and reason through the internet usage controversies will benefit your life and work in many ways. When we think about this topic, we first think about the internet in general. What is the internet? Why is it important? Do we need to have it? How can we use it? What are the benefits of it? What are the risks? How can we make the most of it? How can we use it well? The first part of the presentation will provide an overview of these questions and will provide answers to them. Students can then think about how they can use the internet responsibly. The internet is so important for our society that students have to learn about it and think about it. As educators we try to help students find a balance in their use of the internet, and to avoid overuse and addiction. This section will discuss different issues which may come up for students. We will also discuss academic ethics and internet usage, and how they impact on each other. How do we use the internet ethically? What do we need to consider and how does it impact on how students use the internet? Some additional
