On January 25, 2009, the AutoCAD 2009 product was released, and with it a new graphical user interface (GUI) and system framework. AutoCAD is a desktop application, which means it runs on Windows, macOS, and Linux computers. It can be used for drafting (line, area, or freehand), drafting math and measurement tools, and viewing, annotating, and printing 2D and 3D graphics. AutoCAD is an industry standard CAD program for 2D and 3D design, and is generally used for architectural, mechanical, civil, and structural design. Many architecture firms and engineers use it for architectural and engineering projects. Check out the Compare section for a list of the similarities and differences between AutoCAD and AutoCAD R2020. AutoCAD isn't free. It can cost anywhere from $800 to $5,000 (AU$7,840 to $60,630). AutoCAD LT is free. Autodesk offers its premium subscription service, AutoCAD+, for $16.95 per month ($1.495/month, US$1,185/month). AutoCAD+ subscriptions include access to new features and tools as they become available and updates. Autodesk also offers a $79.95 per month Autodesk Ultimate subscription service, which includes everything in AutoCAD+ with access to Autodesk software for $379.95 per month ($3,489/month, €3,209/month, and £2,184/month). There are other more economical AutoCAD subscription options and AutoCAD subscription plans. Check out the pricing section for details. You can download AutoCAD for Windows and macOS from the following websites: Before AutoCAD, CAD programs were available only to companies that had the money to buy and operate mainframe computers, or were willing to share the expense of purchasing an onsite mainframe computer. As the cost of the computers and mainframe software increased and computer graphics capabilities improved, desktop CAD became affordable. There were numerous early versions of CAD software for the PC that incorporated AutoCAD

LISP is a macro language for AutoCAD. In LISP, any drawing object, such as lines, can be processed with the LISP language. This is mainly used to automate repetitive tasks, such as batch-drawing processes. AutoLISP enables a developer to process AutoCAD drawing files and generate text or graphics files. These can be stored on disk or on the server to be used later. Visual LISP (VLS) is a very user-friendly way of interacting with AutoCAD and its programs. It is essentially a graphical user interface (GUI) to LISP. AutoLISP was replaced with AutoCAD's VBA application programming interface (API) in 2002, and LISP was merged with the Visual LISP product. AutoCAD now supports both VLS and the.NET API, although the VLS interface is less frequently used. AutoLISP is used to automate drawing, modification and analysis tasks in AutoCAD. AutoLISP can also be used for non-AutoCAD drawing tasks. Most new VBA projects are now developed as AutoLISP modules and loaded on startup. Traditionally the user interface of AutoCAD has been limited to a keyboard and mouse. In 2016, the AutoCAD mobile apps for Android and iOS were launched, adding touch-screen functionality. AutoCAD 2020 will continue to run on Windows operating systems, but will no longer be available as a stand-alone version. Instead, it will be part of the Autodesk Design Suite, part of the Autodesk Autodesk 360 software, or as part of the Autodesk Architecture software. The application will still run on the Windows operating system. AutoCAD is the primary 2D CAD software used in the mechanical and architectural design fields, and was the first commercial 3D CAD software. It is the predecessor to AutoCAD LT, which was developed in the mid-1990s. History AutoCAD was originally an entirely separate product, from 1982 until 1994, when it became a subsystem of AutoCAD Architecture. It had no direct relationship with other AutoCAD products until the release of AutoCAD LT in 1998. AutoCAD was originally written in LISP in the 1980s. By the early 1990s it was rewritten as an add-on to the AutoCAD R10, and continues to use 5b5f913d15
