PC. Resident Evil 5 is an all-new survival horror experience  
packed full of new weapons, equipment and enemies to.Q:  
ASP.NET MVC 2 - Code First Model Ok, in code first you  
can delete a model and just generate a new one if needed.  
However, I have a situation where I want to migrate a model  
into a new table that has a foreign key relationship. For  
example, I have a model called MessageType with a foreign  
key relationship to a table called Message to create a  
Messages table. Is there a good way to accomplish this? A:  
Yes, you can just change the entity, and then the DbContext  
(or whatever) will be aware of the changes and will create the  
tables and do all the rest for you. I don't know if you're using  
EF, but you can do something like this: var message = new  
MessageType(1); using (var dbContext = new MyEntities()) {  
    dbContext.Entry(message).State =  
    System.Data.Entity.EntityState.Added;  
    dbContext.SaveChanges(); } r w h e n 8 3 i s d i v i d e d b y
