This article describes how you can use it. One thing I like about DocBook is that you can now use it as a source code generator for LaTeX and in fact DocBook/XML files can be directly converted to LaTeX or PDF files. There is an online version of DocBook called DocBook Online which is great because it allows you to save and print a version of your document while you are editing. It is similar to how you can edit a Word document online. Uploaded to the document is saved and edited online then downloaded to the local copy to view while editing. It will automatically save any changes as you go along. DocBook has been around for a long time and is well used, it is not as messy as for example MediaWiki. I suggest you read and digest some of the documentation before embarking on a new life in DocBook. I posted this over at Wordpress Daily Prompt, one would have thought it would be easy to recognise formatting issues such as in this case. I must admit it was the first time I had come across this article and I have to say that I was able to find it fairly easy, it was the formatting that made it difficult. Can anyone tell me why I can't add images and links into a post? I thought that I had fixed it many months ago but it has apparently just come back. Is there a setting that I am not aware of that controls what you can add to a post? Thanks to all for the comments which were helpful in clarifying what was required here. Worth noting that this is a "Wordpress Daily Prompt" we are talking about and that some posts are longer than others. Some articles are more difficult to format than others. I think this one is reasonably straightforward to do but the source file does not have any content. The source file is fully dependent on the post and it is rather long in its own right, so I think anyone who has ever submitted a post to a contest or journal article will have experienced a similar issue to this. I have not attempted to read this through. If you do not have content for the article then try and imagine the content.

And you can capture web pages from Edge to Office Online. The preview size for images can be too small or too large, and it can be difficult to identify when the correct size is displayed on a page. Here is a simple way to quickly make images with larger size. After selecting an image with the Insert tab or the Insert > Picture menu, check or uncheck the Scale selected objects check box. The check box is available only when the Scale images is set to Large. The next step is to select the amount you want to scale. You can adjust the scale of the image directly using a slider under the image. Or, you can select the desired scale and then change the image's zoom percentage by using the Zoom percentage text box directly above the image. By default, the Zoom percentage is set to 100%, but the zoom percentage can be adjusted. ... *Note: After 6a5afdab4c

Regulation of the yeast phosphoenolpyruvate carboxykinase (GTP):ATP exchange reaction by ppGpp. Methanol-grown yeast cells exhibit significantly higher levels of ppGpp (2.5 mM) and considerably lower levels of (p)ppGpp (0.5-1.0 mM) than glucose-grown cells (ppGpp = 1.6 mM, (p)ppGpp = 2.0-2.5 mM). The regulatory effect of ppGpp, however, is restricted to the PEP carboxykinase enzyme. Steady-state kinetic studies using purified yeast PEP carboxykinase demonstrate that the regulatory ppGpp-protein complex is noncovalent in nature and that the enzyme is active under two distinct catalytic conditions: 1) with the substrates phosphoenolpyruvate (PEP)

In an exclusive interview with the Star Tribune, former Minneapolis City Council member Betsy Hodges admits she did in fact vote against appointing the city's first female police chief. Hodges, who now works at the Heartland Health Foundation, said she voted against Karen Bennett's appointment by a 5-4 margin in April 2006. She said she abstained rather than vote for Bennett. "They were both qualified," she said of the current police chief and the former assistant chief. "We were in a quorum (where you can vote) and the president wasn't there." Pete Stauber, the president of the Minneapolis City Council, confirmed the vote to the Star Tribune but declined to discuss the specifics of his strategy in trying to unseat Hodges and fellow City Council members Frank Frazee and Gary Schiff to a third term. "We've made significant progress since Betsy Hodges and Gary Schiff ran for re-election in 2006 and we're pleased to have such a talented group of candidates this year," Stauber said. Hodges, who served on the Minneapolis Police Commission, said she abstained rather than vote against Bennett's appointment. Bennett now heads the Minneapolis Police Department and faces a high-profile court case stemming from her firing of four officers. On Wednesday, Hodges was on the Star Tribune's editorial board defending her vote, calling it "a very hard decision" and "one I agonized over for a week." "For me, it was the job of the council chairwoman to not let things go forward without the chairperson present," she said. "There was a process that was not followed." Voting after the council meeting, Hodges said, "I believe the current chief is fit to be chief and he
