Animated GIF Creator is a nice software that enables you to create animated GIF files from selected photos or pictures. The application provides simple interface and enables you to adjust the properties of the frames such as length, delay, transparency, etc. Animated GIF Creator can be used to create GIF animations from both your pictures and also from video clips. You can create image loops, GIF animations, animations from video, etc. You can import your files in all popular formats including BMP, GIF, JPG, PNG, TIF, TIFF, PICT, PGM, PSD, PS1, PS2, RTF, PDF, EPS, EPSF, EMF, DCR, DIB, ICB, ICO, PCX, etc. Animated GIF Creator - Import any photo into animated GIF format. No pictures are displayed after your import, just click the "Animate" button and start the Animated GIF creation process. You can select up to 100 photos from your photo files to create an animated GIF animation. All your pictures must be in GIF format and they must be at the same resolution. All pictures must be square to avoid stretching. You can add frames to the animation by setting their delay time or looping them. You can preview your animation before saving it. You can adjust the color of the transparent parts. You can choose the length of the frame. Animation speed can be modified and frames can be set with any delay time. You can adjust your animated GIF creation for video files as well. Animated GIF Creator - Create GIF animation from your video. You can import up to 15 video files to create an animated GIF animation. Once you start the Animated GIF creation process, you can select your video files and click the "Animate" button. Video files must be in GIF format and the size must not exceed 5MB. You can select the frames you want to animate and set their delay time or loop them. You can preview the output GIF. Once the video is converted to the animated GIF format, you can choose how long you want to play each frame. You can also select the speed of animation. If you want to go beyond the 5 MB limit of the video file, you can convert the video to a suitable format by selecting the format from the output format menu. Animated GIF Creator - Create Animated GIF with photo frames. You can import up to 100 frames and create an animated GIF animation. Once you start the process, you can select all

Make all your pictures in one click. Upload pictures from your system folder or your hard drive and generate beautiful animated GIFs. Pleistocene disequilibrium at the base of the genealogical tree of several human mitochondrial lineages. In this study we analyze the population structure of the HV1, HV0, MV0, and MV1 sequences in the Northern Hemisphere. The great variation of the frequencies of these sequences in the studied population samples of different regions of the globe has been associated with the fact that these sequences are clinally distributed in humans. Our results suggest that these clinal variations are not associated with the geological events of the Pleistocene. At least one of the sequences, the HV1, seems to be well-equilibrated in all the geographic areas studied and this indicates that the population structure of this sequence must be influenced by the demographic events of the Holocene. Please see below for details regarding the previously scheduled meeting this morning. If you have any questions, please call me. Thanks. ----- Forwarded by Michelle Cash/HOU/ECT on 11/27/2000 05:01 PM ----- From: Enron London - EOL Marketing Group 11/27/2000 04:21 AM To: Michelle Cash/HOU/ECT@ECT cc: Subject: Enron Credit ----- Forwarded by Enron London - EOL Marketing Group on 11/27/2000 03:23 AM ----- Ben F Jacoby@ECT 11/27/2000 10:16 AM Sent by: Ben Jacoby@ECT To: Enron London - EOL Marketing Group cc: Kay Mann/Corp/Enron@Enron Subject: Enron Credit Kay: I talked to Roger Ondreko and he has graciously agreed to be the primary contact within Enron Credit.
