What's New In RAS Monitor?

Monitor and analyse RAS sessions on local area networks. RAS stands for Remote Access Server and is the network software that allows users to connect to a server and gain access to its applications. Where RAS is used, usually to allow remote access to a computer or network, then it is termed Remote Access Service. RAS Monitor Features: • Monitor RAS sessions on all the hosts of the local area network. • Support multiple databases of host list. • RAS database can be synchronized with Remote HostList database. • RAS Monitor can log the RAS password changed. • Friendly to Windows NT based server. RAS Monitor is the best software to monitor RAS Login sessions from your PC. Simply install RASMonitor on your NT, 95, Windows 2000, Windows NT4, ME, 2000, XP, 2003, Vista, 7 or Server. RAS Monitor can monitor and manage RAS sessions to better understand the RAS usage on your local network. Known Issues NOTE: While the TREST server works great with AutoHotkey, some features still need to be tuned such as when the app is closed or it's ran under a different user. In this case just leave the app running in the background. What's New - Added the new TREST service (restart does not need to be needed) - New configuration option under the options button of the program; - Lots of bugs fixed... User Reviews MOST POPULAR Internet Usage Monitor & Analyzer - PC/mobile Today more than almost anything else, we're connected. We're connected to work, connected to friends, to get news, to check in on our brothers and sisters, and the list goes on. Although you might spend most of your time going from one location to another, it doesn't mean that you're not connected. In fact, you may be spending even more time than you realize on the Internet, and you might not even realize it because a computer might be doing most of your Internet communication for you. There are devices available, of course, to help you monitor Internet usage, but not many of them are compatible with every kind of system. The Internet Usage Monitor is an easy-to-use program that will analyze your Internet usage and help you monitor your daily Internet activity. And it's free to download and use. Internet Usage Monitor Description: Get
