I want to add foreign key constraints to all my tables in my db. I've tried: alter table table1 add constraint FK_table1_table2_id foreign key (table2_id) references table2 alter table table2 add constraint FK_table2_table1_id foreign key (table1_id) references table1 But I get this error message ERROR 1064 (42000): You have an error in your SQL syntax; check the manual that corresponds to your MySQL server version for the right syntax to use near 'table1 add constraint FK_table1_table2_id foreign key (table2_id) references table2 at line 1 I'm fairly new to mysql and I'm not sure if I've used the right syntax. A: Please do a back up of database and try this below queries Query1 : ALTER TABLE foo_tbl ADD CONSTRAINT foreign_key_name FOREIGN KEY (COLUMN1) REFERENCES bar_tbl (COLUMN2); Check proper syntax by using this Query2 : SHOW CREATE TABLE foo_tbl; If you don't have foreign key column named in the table you can drop the column, by using the below query Query3 : DROP COLUMN foo_t 1cdb36666d

Our goal is always to provide the highest quality translation, to ensure that the final product is of the highest standard. All translations are done by native-speaking Swedish translators, we do not employ any interlanguage (the translations are done by using a Swedish-English dictionary as a source for the translations). We strive for accuracy and uniformity at all levels of the translation process - from the initial creative stages to the final proofreading and the production of the final product. the number of σ_i s that are observed at the boundary; for $k \geq 1$, $D^{(\alpha)}_k$ is the number of terms in which a σ_i appears exactly k times. Thus,

$$D^{(\alpha)}_k = \sum_{i \geq 1} \frac{D^{(\alpha)}_i}{i^k}$$
