“Motion Capture was a critical component to achieving the look, feel, and technical features needed for the FIFA franchise,” said Leo Olebe, Creative Director at EA Sports. “By collecting our 22 real-life football players’ data and mapping that onto the player animation models, we’ve been able to create the most complete, dynamic and authentic football experience yet.” A variety of new finishing animations provide a smoother and more realistic finish on Player Connected Shooters (P.C.S.), including shots on goal. For the first time, goalkeepers can move, perform slide-ups and head pokes. Passers will now attack more often when they have the ball, to add more unpredictability to the attacking game. New Team Play Ambience, which changes the pitch, the color and the mood, as well as atmosphere, throughout the game. The ambient soundtrack also reacts to players and gameplay on screen. Additional new features include: Livestream data provides more global behavior data on players, while also providing a visual representation of player performance and team energy. FIFA Ultimate Team allows players to build the Ultimate Team squad, and view the strength and potential of every player. Selecting any player in the game will put a card into a random card pack to give players new combinations and play styles. FIFA Ultimate Team provides options to customise the look and feel of the entire game, by adjusting the language, fonts and sounds. FIFA Ultimate Team game modes such as Classic Mode and Training Mode are re-imagined and updated. In addition, “Creator Creations” in FIFA Ultimate Team feature an overall visual polish, including new animations, player profiles, and stadium ambiances. The feature is based on fan feedback received at E3 2016, which generated the most responses from fans. FIFA 22 will be available for PlayStation 4 and Xbox One on September 27 in North America and September 30 in Europe. The cover star for FIFA 22 is Neymar, with Kevin-Prince Boateng and El Shaarawy also appearing on the new cover. FIFA 22 Squad Reveal Squad Reveal Highlights: Drogba, Messi, Ronaldo and Lampard (PS4 Exclusive) Football Player of the Year winners Cristiano Ronaldo and Lionel Messi have been revealed as the cover star and starting squads

## **Features Key:**

- 
- **New Authentic Player Balances** – FIFA 22 features unprecedented attention to details to deliver more realistic and authentic player poses, animations and reactions on the ball and in the penalty box. See players say, move, react and hear the sound of chips falling into the net in the new goal-kicks animations. Players also have more hair and body art, and will react to sounds with finesse to mimic the real world. Rediscover your favorite real-world superstars in authenticity that goes beyond the real of your game.
  - **New Stealing System** – Stop the ball at its source. Stop players in their tracks and intercept passes that could be devastating to your team. Tackle exploits with more power, and more touches and variety. More than ever, defend with more strength, speed and stamina.
  - **New Player Traits** – The Control trait no longer changes the Intelligence, Agility and Stamina traits, but instead focuses on other aspects, such as flexibility.
  - **New Hack System** – Invite your mates to a training session and hurl the ball at them to increase your Connection and connect with others on the pitch. Experiment with more play styles by mixing Formation with Tactics until you find the ideal lineup for your team.
  - **More Play Styles** – Expand your playing tactics by employing the classic Formation and the intuitive Shape Shift concepts, as well as introduce Rotation play and the Lead Goalkeeper in FIFA 22.
  - **Control Your Tactics** – Decide on your target ahead of time and control your forward runs to deceive the opponent and create better options for your teammates.
  - **Goalkeeper AI** – Goalkeepers in the new game are more intelligent. They use positioning, when to step up and when to dive, and when to jump out and step up to stop the ball from reaching its target.
  - **New Impact Engine** – Create more artificiality to the ball when it is in the air with more realistic deflections. Watch the seams fly for goal kicks and penalty shots with new jumping acrobatics and overhead shots.
