The key elements for a risk assessment plan.Q: Extending pre-installed app, cannot find the source I have a pre-installed app running. I want to make a change to it in a different app I have on the device. If I do adb logcat I find out that the change to be made is being made by the pre-installed app and not by my app, that is, it's not finding my app's package name. This is on a galaxy S 3G. A: You can use the command android update to install any changes from the Android Play Store. If you can't find the package name of your app you can use the Command Analyzer to find it. (See this answer for more information) Clipper Antennas, the leading manufacturer of antenna products for professional and amateur DXers, has just released a new product - a high gain, dual band antenna to cover all popular DX bands. On sale now through Oct. 15, this 50 watt nichrome-wire dipole antenna is rated at 34.3 dB at 15 meters. In the past, this antenna would have cost around \$100. The new redesigned Clipper Antenna weighs in at only 1 pound 2 ounces and comes in a carry case for easy transport. The dipole is manufactured in the USA and is covered by a 1 year warranty. "Since the introduction of our original Clipper Antenna over twenty years ago, this antenna has become an extremely popular choice for many DXers," said Lee Duck, Chief Engineer of Clipper Antennas.
