* Adobe Photoshop Lightroom : A small, easy-to-use program that enables people to organize, edit, and store their digital images. It's built on the Adobe Photoshop platform and works with Photoshop files. * Photoshop Elements : A more reasonably priced version of Photoshop, designed for advanced photographers who need a simpler interface. * Photoshop Touch : A mobile app available through the Apple App Store that enables you to edit your images and share them without an Internet connection. At the time of this writing, the newest version of the software was Photoshop CS7, which has been available since July 2009. Figure 1-7. The Photoshop layers palette is one of the most flexible tools in Photoshop. You can see how this image was constructed, beginning with a selection and adjustment layers, followed by multiple color layers, then adjustment layers, and finally using masking. To create a perfect-looking photo, you must first understand the basics of digital photography. Even the most seasoned photographer still has a surprising amount to learn, but the first place to start is with how to best work with your DSLR. * Bracketing : When shooting images, especially in low light or for high-quality images, using the right number of exposures (called brackets) is critical to maintaining full dynamic range in your final image. Many DSLR models come with a built-in bracketing feature that enables you to take sequential images with different exposure settings. To do this, press the shutter-release button, hold the button down, and then raise the camera and take the bracketed images. Because this saves time for you, don't be shy about using brackets in low-light and fast-action situations. * White Balance : White balance is the process of setting the correct color temperature for a white object—for example, the proper color temperature of white clothing in a dark room. The wrong color temperature can cause flat colors and washed-out blacks. White balance is also important for taking beautiful photos of people. The best white balance can be achieved with the built-in Automatic White Balance (AWB) on most cameras, or you can manually dial in a specific color temperature. The reason the camera has a specific white balance is because your actual subject is often very different from a white object you may be photographing. When shooting landscapes, for example, the correct white balance will be much different than

You might be wondering why I added a Photoshop Elements tag to this tutorial. In this tutorial we will learn to use Photoshop Elements to quickly and easily create a PSD image. Photoshop Elements is a well-rounded, multi-faceted image editor that we are going to use to create a simple PSD template. We will be using Apple's built-in "View" and "View" options to crop and resize our image to the page in which we want to use it. You can learn more about those options here. We will also use "Shapes" to create a cute little styled logo. Lastly we'll add an empty layer and use "Effects" to create a shimmery background. The finished result will be a simple PSD file that we can save and share. We will import our template on top of an image we will get from the internet. The process of importing that image will consist of two steps: download the image and convert it to "PSD-WPS". Now that you know how Photoshop Elements works, we will get started.

Here's our project: From now on I will be using the abbreviation "PSE" for "Photoshop Elements". Step 1 - Crop your image Start by loading the image you want to use. Open it in the "View" option and resize it as you wish. Since our logo only has a width of 70px, we need to crop it to a height of 70px (and retain the aspect ratio). Click on the "Shape Tool" icon or press the "U" key to activate it. Click inside your logo and drag it to the right. The left-hand side (horizontal) of your canvas will open up and you can select the "Rectangle Tool" and create a rectangle inside this left section. Resize this rectangle until it is 70px high and press "Enter" when you are done. If you don't have the "Rectangle" tool, you can also use the "Smart Rectangle" tool. This will allow you to not only create a rectangle but also a 05a79cecff

FlexiCare Botox® | Botox® Treatments in Brampton Botox is a wonderful treatment for patients who wish to improve their appearance by eliminating those distracting lines that appear on the forehead and along the jawline. Botox® injections can help patients look more youthful and attractively confident. Botox® is injected into the facial muscles to reduce the muscle movement that can cause lines and wrinkles to form. Typically, a series of five or six treatments are performed to achieve the ideal results. Botox® is a great option for patients who are looking for nonsurgical treatment that is effective in reducing lines. Since this nonsurgical treatment cannot be done daily, you may not be able to hide any lines or wrinkles in the meantime. Botox® is performed using fine, customized needles that are extremely small in size and they are injected into the muscles around your mouth, creating a smooth appearance with a natural look. Schedule your Appointment Today! If you are experiencing that stiff neck from bad posture, Botox® injections are a great option. This nonsurgical treatment will help you sleep better and feel less pain.

Michelin Teams With Privateer Automotive Group To Launch The New Super Sport Wheels Michelin makes those giant tires. So, it's a little surprising that they decided to partner with a new company called Privateer Automotive Group to market a new line of super sport wheels. But based on just what they've announced so far, they've chosen a perfect partner. Michelin makes those giant tires. So, it's a little surprising that they decided to partner with a new company called Privateer Automotive Group to market a new line of super sport wheels. But based on just what they've announced so far, they've chosen a perfect partner. The brand new Privateer Automotive Group was announced last week and they're aiming to be the "driving forces behind a modern renaissance in the automotive industry." Their first offering, two new super sport five-spoke wheels, is called the ETS-80 Roadster. These wheels are made in Italy and available in a beautiful black finish. The massive eighteen inch was released last week and also features a carbon fiber face for an elegant design. On the backside of the wheel you'll find the same carbon fiber material. The original idea behind the

Dispersion-Free Ultrasound-Guided Nanosized Cs-Doped CaF₂ Laser Irradiation for Highly Efficient Pulp Cell Death. Laser pulp therapy (LPT) offers a possible solution for early pulp inflammation and necrosis. But, existing LPT requires either high pulse energy or multiple passes to induce damage, therefore still leaving unresolved challenges in treatment efficiency and safety. In this study, the LPT technology is modified by using nanosized Cs-doped CaF₂ glass particles as an optical absorber for laser excitation. The Cs-doped CaF₂ has good laser absorption properties with high thermal conversion efficiency, resulting in decreased pulse energy and effective cell death in pulp tissue. Meanwhile, the particles also show excellent biocompatibility toward pulp cells. In vivo experiments further demonstrate that nanosized Cs-doped CaF₂ laser irradiation can efficiently kill pulp cells and induce pulp inflammation-like response. This approach offers great potential for rapid pulp therapy via laser irradiation.

HOMILY This morning we celebrate the feast of St. Francis of Assisi. You may not know it, but today is also the date of his death. I've often said that if you are a Catholic and you haven't heard about St. Francis you haven't heard about the Catholic Church. He is so important that if St. Francis of Assisi didn't exist the Catholic Church would be in deep trouble. Francis was born in Assisi, Italy, at a time when the Roman Empire ruled Italy and it was a center of trade and commerce. Francis was the son of a wealthy merchant who lost his entire estate in a business dispute.

The young Francis was a sickly and frail child who was often taken to a local monastery to be cared for by the brothers in the community. The abbot was a member of the religious order of Poor Clares. At the young Francis' bedside, a young, sickly and frail boy lay dying. He asked the abbot to pray for his soul. Not only was this boy dying, he was a total stranger. He was the richest man in Assisi. His father had been a war hero. His mother was quite the opposite. She was a modest and devout widow. The abbot told Francis his prayers would not be answered unless he converted to their religion. Francis was scared. Here was
