All Mobile phone file available, you can download any Android mobile firmware, smartphone firmware such as Samsung, Motorola, Sony Xperia, Nokia, Blackberry, HTC, Huawei and more. Dassault Systemes has launched its latest version of the PartnerSphere software to help software developers integrate hardware components into their own solutions. Manufacturers developing products such as industrial robots, CNC machines, laser cutters and other manual, mechanical or industrial machinery now have a new way to quickly discover, access and use products from Dassault Systemes to streamline the integration of machine peripherals into their products. The latest release of the software, Version 7.2, includes several new features such as a new user-friendly interface, new APIs for rapid device development as well as the plug-and-play option that simplifies the addition of new hardware elements into a solution. The plug-and-play option allows software developers to simply select Dassault Systemes hardware components from a list and enable them within their software. It also enables software developers to easily build support for multiple brands, models or platforms in one application. With the plug-and-play option in PartnerSphere, software developers have access to all the latest Dassault Systemes hardware platforms, including robots, drones and tablets, from one single platform. Developers can quickly develop robust and reliable software because they can integrate hardware in a flexible manner, whether they are specifying hardware for a device, an entire suite of devices, or a single device. According to a company statement, the latest release of PartnerSphere 7.2 improves the user experience of engineers when designing solutions. It offers an easy and efficient way of integrating software components into various machines while enabling rapid application development. About Dassault Systemes Dassault Systemes is the leading high-performance "3D in architecture, engineering and construction", "3D in services", "iManufacturing" and "Innovation in luxury", based on the 3DEXPERIENCE platform. The Group makes 3D design, digital reality and visualization more efficient, while pioneering in 3D integration and services. Dassault Systemes employs nearly 100,000 people worldwide and had 2015 revenues of € 9.1 billion. Dassault Systemes is listed on d0c515b9f4

Samsung Galaxy S9, 5 Samsung Galaxy S9+, 7 Samsung Galaxy Note 8, 8 Samsung Galaxy Note 8+ with.Tumour regression and remodelling after resection of a recurrent rectal cancer. The place of abdominoperineal resection in the treatment of a recurrent rectal cancer is still controversial. The aim of the study was to compare long-term outcomes between palliative and potentially curative resections in a population of patients who have a recurrent tumour. From 1980 to 2001, 102 patients underwent resection of a recurrent rectal cancer. Forty-six underwent a palliative operation; the remaining 56 underwent a potentially curative resection. The median follow-up period was 3 years. Postoperative morbidity and mortality, tumour recurrence and survival
