**OfficeStatus Free Download Latest**

OfficeStatus Cracked Accounts is a professional application that provides admins and managers with the possibility to track the location, status, and availability of employees from a single interface, thus saving time and money. The program provides admins with the opportunity to monitor the work status of workers, as well as their attendance, and can be accessible from virtually anywhere, as it comes with desktop, mobile, and web interfaces. With the help of this powerful application, managers can improve the collaboration between their staff members, and can also ensure better customer service and response times. Additionally, they can take advantage of virtualization capabilities and resource tracking, all grouped together in a single place. OfficeStatus works like an electronic in/out board, as it is focused on displaying the status and availability of all

---

staff members and on allowing for fast labor routing decisions. Admins can view the status of each employee, their contact information and the date and time when they should be back in the office. Moreover, they can filter status and availability by location and department and can modify the status of any employee with an intuitive scheduler.

OfficeStatus includes automatic status detection and can respond to any change in the availability of a certain user almost instantly. Thus, employees do not need to interact with the application, as it monitors their computer or mobile to track changes.

The feature can be easily configured or disabled. The tool also includes a public view for employee status, which is read-only, and which can be accessed through the web interface. Thus, everyone in the company can learn more about the situation of a certain employee. OfficeStatus includes both Client and Server components. The client can be used on a large number of platforms, but the server works only with Windows Server operating systems. The program's features can be accessed from the web and mobile devices as well.
