We always look for ways to make the program easier to use, but sometimes the simplest changes can have the most impact. So we decided to take a look at the last 20 versions of SyncBack and take the long view. SyncBack 20 2017, our latest version of SyncBack, saw a number of big, incremental improvements. It's now just as easy to backup to a USB flash drive as an external drive. It's easier to organize your backup task with the new SyncBack command line program. And it's easier to search your backups with a powerful new command line tool, SyncBack Search and Export. SyncBack 20 2017 is still a free product, but we have now included an option to pay once per year instead of per use. It's good to be able to pay once per year for the ongoing maintenance and support you expect from a product that's already been on the market for well over a decade. For us, maintaining SyncBack is more than a job; it's a way of life. And for customers who pay once per year, we've done another big change that will make SyncBack even better. We've opened up the code of SyncBack and have added a forum for any feature requests we might not yet have time to implement. SyncBack SyncBack is a backup and file synchronization application. It lets you backup your Windows system to a USB flash drive, to an external hard drive, to a network folder or to a WebDAV folder. It lets you synchronize files and folders across all your Windows PCs. To start a backup,
