It's their way of teasing you to come to their place without you having to leave your comfort zone. Personally, I think it is quite subtle. I like it. Fun fact: if you want to see the full house, all you need to do is close your eyes! [img] If you've noticed, there's a lot of circles in the house, that's because it is on the northwest corner. If you look at the labels on the left, it says "N", "N", "W", "W". And if you still don't believe the house is indeed made out of paper, let me tell you. It's pink.[Selective digestive angiography in the diagnosis of intestinal causes of chronic diarrhea]. The value of selective angiographic procedures in the detection of the intestinal origin of chronic watery diarrhoea was evaluated in 36 patients. The angiographic data were compared to preoperative radiological and surgical findings. In all patients with intestinal stenosis (diameter less than 3 mm) or obstruction an angiography was performed. Additionally, 20 patients with recurrent abdominal pain of undetermined origin or unexplained weight loss and positive history were examined. The sensitivity of an angiography was 96% in the diagnosis of intestinal stenosis, and 78% in the diagnosis of intestinal obstruction. The specificity was only 40%, even in the case of angiographically verified intestinal obstruction. No patient who had, preoperatively, resected adenocarcinoma of the ileum showed signs of intestinal tumour recurrence in the delayed postoperative control. In 15% of the patients with unexplained abdominal pain or weight loss radiological findings were typical for carcinoma of the ileum or appendix. The patient with a malignant tumour who presented with acute abdomen had no radiological evidence of an acute abdomen. 1. Selective angiographic procedures are useful in the examination of patients with chronic watery diarrhoea. 2. Resection of adenocarcinoma of the ileum in cases of chronic watery diarrhoea

Q: How to change css of one div, when a checkbox is selected? I have two checkboxes on a HTML page. In my example, I would like to select one, then update the css of another div. I have seen some examples, but they are always to change the background color of the html itself. If that's not possible, I can put images in there to represent the different checkboxes. Thanks. A: There are plenty of examples out there for conditional stylesheets. The most basic technique is: Checkbox 1 .checkbox {background-color:#ccc} function toggleStyle(element) { if (element.checked) element.parentNode.style.backgroundColor = '#999'; else element.parentNode.style.backgroundColor = ''; } Efficacy of the probiotic Bifidobacterium lactis NIZO 3707 in healthy infants. In two clinical studies, the safety and efficacy of B. lactis NIZO 3707 were investigated in healthy infants at 6 weeks and 6 months of age. A suspension containing 1 x 10(9) colony forming units (CFU) B. lactis NIZO 3707 per g was orally administered twice daily for 4 weeks in a randomised, double-blind, placebo-controlled clinical trial to 20 healthy infants aged 6-9 weeks, receiving breast milk exclusively.
